

Heavy-Duty Industrial Power Connector

This is a heavy-duty industrial power connector with a red housing and protective lid. It is designed for high voltage and current applications in machinery and industrial equipment.

Product Overview

Industrial Power Connectivity

This heavy-duty industrial power connector is engineered for high-performance applications in demanding environments. Featuring a ruggedized design with a protective lid, it ensures reliable power delivery for industrial machinery and critical electrical infrastructure. The integrated strain relief and secure housing design provide long-term durability and safety for professional power distribution requirements.

Technical Specifications

Performance Metrics

Red
Housing Color

Design Features

Heavy-duty, Protective lid, Strain relief, Industrial grade

Pin Configuration

Multi-pin design including dedicated ground connection
