

Heavy-Duty Industrial Sewing Machine

This heavy-duty industrial sewing machine is designed for robust and continuous operation. It features a high-capacity bobbin, adjustable stitch length, and a powerful motor for sewing through thick materials.

Overview

Built for Industrial Performance

This heavy-duty industrial sewing machine is engineered for robust and continuous operation in demanding environments. It features a high-capacity bobbin and a powerful motor capable of sewing through thick materials with ease. Designed for reliability, it is an ideal solution for garment factories, upholstery shops, and other professional settings requiring consistent, durable stitching.

Key Features

Performance Highlights

1 Continuous

Operation Type

1 Thick

Material Capability

Core Capabilities

- High-capacity bobbin system
- Adjustable stitch length
- Powerful industrial-grade motor

Applications

Best For

Garment Factories, Upholstery Shops, Industrial Manufacturing
