

Heavy-Duty Industrial Sewing Machine for Textiles

This industrial sewing machine is designed for heavy-duty textile applications. It features adjustable settings for stitch length and tension control and is suitable for various fabrics and materials.

Product Overview

Industrial Precision Engineering

This heavy-duty industrial sewing machine is engineered for high-performance textile applications, offering robust construction for maximum durability. It is designed to deliver precision stitching across a variety of fabrics and materials, making it a versatile tool for demanding production environments. With user-friendly adjustable settings for stitch length and tension control, it ensures consistent output for garment manufacturing and upholstery projects.

Operational Specifications

Adjustable Settings

- Adjustable stitch length
- Tension control system

Model Identifier	BS20U53
------------------	---------

Applications

Primary Use Cases	Garment Manufacturing, Upholstery, Heavy-Duty Textiles
-------------------	--
