

Heavy-Duty Long Arm Sewing Machine

This sewing machine is designed for heavy-duty use in the apparel and textile industries. Its long arm provides ample space for handling large or bulky items, making it ideal for manufacturing footwear, bags, and upholstery.

Product Overview

Industrial-Grade Performance

The GC1870-M is a specialized sewing machine engineered for heavy-duty applications in the textile and apparel sectors. Designed with a robust long-arm architecture, it provides the necessary workspace for maneuvering bulky materials like leather, canvas, and heavy upholstery. This machine combines precision control with high-durability components, ensuring consistent stitch quality for demanding manufacturing environments.

Technical Features

Mechanical Highlights

- Long arm configuration for large items
- Vertical axis hook for heavy-duty stitching
- Adjustable stitch length controls
- High-precision parameter management

Capabilities & Applications

Leather Sewing, Canvas Work, Upholstery, Heavy Fabric, Footwear Manufacturing
