

Heavy Duty Non-Marring Machinery Rollers

These heavy-duty rollers are designed for moving heavy machinery and equipment while protecting floors. The rollers feature a swivel top for easy maneuvering.

Product Overview

Heavy Duty Machinery Rollers

These heavy-duty machinery rollers are engineered for safe and efficient transport of industrial equipment while protecting floor surfaces from damage. Designed with robust load-bearing capabilities, they offer superior stability and rigidity compared to standard cargo trolleys. Built for demanding environments, these rollers are an essential tool for factories and warehouses requiring reliable, long-term performance.

Technical Specifications

Available Wheel Materials

- Polyurethane
- Nylon
- Alloy Steel

Manufacturing Experience

20 years

Compliance & Quality

Certifications

CE, GS, ISO 9001

Usage Guidelines

Operational Recommendations

For optimal floor protection and load distribution, it is recommended to place a steel plate on the floor surface prior to application. Alternatively, utilizing a U-bar configuration can enhance the stability and safety of the movement process.
