

Heavy-Duty Pipe Cutter

This heavy-duty pipe cutter is designed for precise and efficient pipe cutting. It features a robust frame with multiple cutting wheels and an adjustable screw mechanism for variable pipe diameters.

Product Overview

Professional Heavy-Duty Pipe Cutting Solution

This heavy-duty pipe cutter is engineered for precision and efficiency in demanding industrial environments. It features a robust, heat-treated blade system designed to deliver clean, smooth cuts on steel, iron, and copper tubing. Equipped with an integrated gear mechanism and high-quality bearings, this tool significantly reduces operator effort while maintaining consistent performance.

Technical Specifications

Cutting Capacity

25 mm

Minimum Capacity

75 mm

Maximum Capacity

Compatible Materials

Steel, Iron, Copper

Design & Features

Key Features

- Replaceable blade system
- Heat-treated blades for durability
- Effort-saving gear mechanism
- Bearing-assisted smooth operation
