

Heavy-Duty Portable Air Compressor

This heavy-duty portable air compressor is designed for inflating tires and other inflatable items quickly and efficiently. It features alligator clips for direct battery connection and a stable base to minimize vibration during operation.

Product Overview

High-Performance Portable Inflation

This heavy-duty portable air compressor is engineered for rapid and efficient tire inflation, making it an essential tool for roadside emergencies and outdoor adventures. Built with a powerful copper motor and a robust direct-drive system, it delivers reliable performance for a wide range of vehicles, including ATVs, trucks, SUVs, and sedans with tires up to 33 inches. The unit features a stable base to minimize vibration and connects directly to vehicle batteries for consistent power.

Technical Specifications

Rated Current

30 A

Rated Current

Power Source	12 V DC
