

Heavy-Duty Power Generator

This power generator is designed for demanding applications, delivering stable and consistent power. Equipped with multiple AC outlets and a monitoring control panel, it ensures efficient operation.

Product Overview

Robust Power Solution

The ZDG12000EW is a high-performance, heavy-duty power generator engineered for demanding industrial and professional applications. Featuring a four-stroke direct injection engine, it delivers stable power output with a rated capacity of 3.0KVA. Designed for versatility, this unit includes an integrated welding function, making it an essential tool for construction sites and emergency backup needs.

Core Performance

Rated Output

3 KVA

Rated Output

230 V

Rated Voltage

13.1 A

Rated Current

Welding Specifications

Welding Performance

Metric	Range/Value
Current Range	80-300A
No-load Voltage	55-65V
Load Voltage	26-35V

Engine Details

Engine Specifications

- Model: ZD1100FAE
- Type: Single Cylinder, Vertical, Four-stroke, Direct Injection
- Rated Rotation Speed: 3000r/min
- Output: 9.5kw
- Cooling: Forced-air cooling

Operational Logistics

Operational Metrics

16L Fuel Tank, 6h Continuous Run Time, Electric Starter, 87dB Noise Level

Physical Dimensions

Weight & Dimensions

175 kg

Net Weight
