

Heavy-Duty Power Transmission Gearbox

This gearbox is a robust and reliable power transmission solution designed for heavy-duty applications. It features precision-engineered gears and bearings within a durable housing, ensuring smooth and efficient operation.

Overview

JT1380 Marine Gearbox

The JT1380 is a robust and reliable power transmission solution engineered for heavy-duty applications. Designed with precision gears and bearings, it ensures smooth and efficient operation even in demanding environments. Its durable housing provides essential protection against contaminants, making it a versatile choice for power generation, manufacturing, and construction sectors.

Technical Specifications

Model	JT1380
Primary Application	Marine / Industrial

Features

System Integration

- Multiple input shafts
- Multiple output shafts

Key Features

Heavy-Duty Construction, Precision Engineered, Contaminant Protection, Versatile Integration
