

Heavy-Duty Steel Truck Bed Frame

This truck bed frame is constructed from durable steel tubing with a reinforced base. It features integrated side rails and a headboard for enhanced stability and load containment, with a modular design for easy installation.

Product Overview

Built for Reliability

This heavy-duty truck bed frame is engineered for professionals requiring a secure and durable platform for cargo transportation. Constructed from high-strength steel tubing with a reinforced base, it offers superior load support and stability. The modular design ensures compatibility with various truck models, while the corrosion-resistant red finish provides long-term protection and a clean, professional aesthetic.

Technical Specifications

Material	Steel
Surface Treatment	Corrosion-resistant red coating
Key Features	Reinforced base, Modular construction, Side rails included, Integrated headboard

Application

Suitability	Wide range of heavy-duty truck models
