Overview

Industrial Welding Performance

The BX1 series represents a range of robust, heavy-duty stick welding machines engineered for demanding industrial environments. These units are designed to deliver a stable arc and consistent welding performance across various materials and applications. With a focus on reliability and high efficiency, this equipment is built to handle intensive welding tasks with ease.

Technical Specifications

Available Models

- BX1-315
- BX1-400
- BX1-500
- BX1-630

Primary Use

Industrial • Heavy-Duty

Welding Process

Stick Welding, Manual Metal Arc
