

Heavy-Duty Tunneling Tool

This tunneling tool is designed for heavy operating conditions. It features a robust construction for high strength and durability.

Product Overview

Professional Tunneling Tools

Engineered for high-intensity excavation, these heavy-duty tunneling tools offer robust construction for superior durability in demanding operating conditions. The range includes specialized wear parts designed to meet the rigorous requirements of professional tunneling projects. These tools are available in various strength configurations to ensure compatibility with diverse environmental and material challenges.

Compatibility

Compatible Equipment Types

Vermeer, Ditch Witch, Case, Barreto, Astec, Lowe, Bradco, Bobcat, Groundhog, Toro
