

Heavy-Duty Wheel Chock with Integrated Spike

This heavy-duty wheel chock provides secure vehicle immobilization on various surfaces. Constructed from high-impact resistant polymer, it withstands harsh conditions and features an integrated spike for enhanced grip on soft ground.

Product Overview

Heavy-Duty Stabilization

This heavy-duty wheel chock provides reliable vehicle immobilization for trucks, trailers, and heavy equipment. Engineered from high-impact resistant polymer, it offers exceptional durability against harsh weather, oils, solvents, and acids. The integrated spike design ensures superior traction on soft ground surfaces, guaranteeing safety and stability during maintenance or loading operations.

Key Features

Safety Functionality

- Integrated spike for soft ground grip
- Lightweight design for ergonomic handling
- Tethering and mounting compatible

Material Composition

High-Impact Polymer, Oil Resistant, Solvent Resistant, Acid Resistant, Weatherproof

Technical Metrics

Equipment Compatibility

Trucks • Trailers • Heavy Equipment
