

Heavy-Duty Wheel Loader for Mining

This wheel loader is designed for mining and construction applications. It features a large-capacity bucket and high-traction tires for optimal maneuverability.

Overview

Built for Demanding Mining Environments

This heavy-duty wheel loader is engineered specifically for rigorous mining and construction applications. It combines a high-capacity bucket with a robust hydraulic system to ensure efficient material handling and powerful digging performance. Designed for durability and operator comfort, this machine provides the reliability needed for continuous operation in challenging terrain.

Key Performance Metrics
