

Heavy Machinery Moving Dollies

These heavy machinery moving dollies are designed for transporting heavy loads. Their robust construction and multiple rollers ensure smooth and efficient movement.

Product Overview

Professional Machinery Moving Solution

These heavy machinery moving dollies are engineered to facilitate the safe and efficient transportation of substantial industrial loads. Featuring a robust, durable construction with multiple rollers, they ensure smooth movement across factory floors. The design includes 360-degree rotation capabilities, providing the maneuverability required for complex industrial logistics and load positioning.

Technical Features

Design Highlights

- Robust, heavy-duty construction
- Multi-roller system for smooth movement
- Optimized for industrial environments

Rotation	360 degrees
Primary Application	Industrial, Heavy Load Transport, Machinery Moving

Support & Services

Included Services

Load/Unload Consultation • Technical Advice
