

Hermetically Sealed Refrigerator Compressor

This high-efficiency compressor is designed for refrigerators and commercial refrigeration units. It is also suitable for condenser units and other cooling applications.

Overview

High-Efficiency Hermetic Compressor

The X120G is a high-performance hermetically sealed compressor engineered for demanding refrigeration applications. Designed specifically for HBP (High Back Pressure) systems, this unit delivers a cooling capacity of 1100W with an optimized COP of 2.2. It features a robust CSIR motor type and operates efficiently within a 220-240V/50Hz power range.

Technical Performance

Key Performance Indicators

1100 W

Cooling Capacity

2.2 W/W

COP

12 cm³

Displacement

Motor Type

CSIR

Refrigerant

R134a

Electrical Specifications

Voltage/Frequency

220~240V/50Hz

General Information

Application Class

HBP

Model Number

X120G
