

Hex Bolt Sleeve Anchor

These sleeve anchors are designed for secure fastening in concrete, brick, and block. The anchor features a hex bolt, cone nut, washer, and sleeve, ensuring a firm grip when tightened.

Product Overview

Quality components ensuring even pressure distribution and firm grip.

Professional Grade Sleeve Anchors

These high-performance sleeve anchors feature a robust assembly comprising a hex bolt, cone nut, washer, and an expansion sleeve. Engineered for secure fastening in concrete, brick, and masonry, they offer reliable load distribution through the expansion mechanism. The hexagonal bolt head allows for easy tightening with standard installation tools, making them an ideal solution for a variety of industrial and construction anchoring applications.

Technical Specifications

Available Material Grades

4.8 • 5.6 • 6.8

Size Range

- Diameter: 8mm to 16mm
- Length: 45mm to 170mm

Key Metrics

50 kN

Pull-out strength

Materials & Compatibility

Concrete, Masonry, Brick, Block
