

Hex Nuts

Hex nuts are used for fastening and securing parts in mechanical and industrial applications. These metal nuts feature internal threading to mate with bolts or screws.

Overview

DIN 934 Hex Nuts

These DIN 934 hex nuts are essential industrial fasteners designed for reliable and robust mechanical connections. Featuring precise internal threading, they are engineered to mate securely with bolts and screws in a variety of assembly applications. Their versatile design makes them a staple component for machinery, construction, and general industrial fastening needs.

Technical Specifications

Standard	DIN 934
Product Code	181
Fastener Type	Hex Nut
Common Applications	Mechanical, Industrial, Construction, Assembly
