

Hexagonal Mesh Wire Fencing

Hexagonal wire mesh is used for fencing, enclosures, and protective applications. It is available in galvanized and plastic-coated options.

Product Overview

Versatile Hexagonal Mesh Fencing

This hexagonal wire netting is designed for a wide range of agricultural, industrial, and residential applications. Featuring a distinctive hexagonal pattern, it offers a balance of structural integrity and flexibility for uses such as poultry enclosures, garden fencing, and erosion control. The product is available in both galvanized and plastic-coated finishes to suit different environmental needs and corrosion resistance requirements.
