

High-Capacity Diesel Generator for Continuous Power Supply

This diesel generator is designed for continuous power supply. It features a robust engine, efficient cooling system, and advanced control panel for reliable performance in demanding applications.

Product Overview

High-Capacity Continuous Power Solution

This high-capacity diesel generator is engineered for reliable, continuous power supply in the most demanding industrial and commercial environments. Equipped with a robust engine and an efficient cooling system, it ensures stable performance for critical operations. The advanced control panel allows for seamless monitoring and management, making it an ideal choice for both primary power generation and emergency backup applications.

Key Performance Metrics

Rated Output

100 kVA

Continuous Power

Application Suitability

Industrial, Commercial, Emergency Power

Technical Specifications

Power Type

Continuous • Backup

Cooling System

Advanced liquid cooling system

Control System

Advanced integrated control panel
