

High-Intensity Discharge Searchlight

This high-intensity discharge searchlight delivers exceptional brightness and a long beam distance. The rugged construction ensures durability and resistance to impact and weather.

Overview

High-Intensity Discharge Searchlight

The High-Intensity Discharge (HID) Searchlight is a robust lighting solution engineered for the most demanding environments. Featuring advanced HID bulb technology, this unit delivers exceptional brightness and extended beam distance, making it an essential tool for search and rescue operations, industrial inspections, and outdoor activities. Its rugged construction and ergonomic design ensure reliability, durability, and ease of use in critical situations.

Technical Specifications

Performance Highlights

1 Optimized

Beam Focus

1 Superior

Efficiency

Lighting Technology	High-Intensity Discharge (HID)
Key Features	High-Intensity Output, Long Beam Distance, Rugged Construction, Energy Efficient, Ergonomic Handle

Applications

Recommended Use Cases

- Search and Rescue Operations
- Industrial Inspections
- Outdoor Activities
- Demanding Environments
