

High Intensity Discharge Work Light

This work light features a high-intensity discharge (HID) lamp, providing powerful illumination. Its rugged construction ensures durability and reliability in challenging conditions.

Product Overview

High-Performance Illumination

The High Intensity Discharge (HID) Work Light is a robust lighting solution engineered for demanding professional environments. It utilizes advanced HID lamp technology to deliver powerful, consistent illumination, significantly enhancing visibility in challenging conditions. Designed with durability in mind, this light features rugged construction, a comfortable grip handle, and a stable base for reliable performance in various industrial and field applications.

Technical Specifications

Ideal Applications

- Industrial Sites
- Outdoor Field Work
- Emergency Services
- Construction Environments

Light Source	High Intensity Discharge (HID)
Key Features	Rugged Construction, High-Intensity Output, Stable Base, Ergonomic Handle
