

High-Intensity LED Lighting Module

This high-intensity LED lighting module is suitable for various illumination needs. It features a multi-LED array that provides efficient and uniform light distribution.

Overview

High-Intensity LED Lighting Module

This high-intensity LED lighting module is engineered for diverse illumination applications, ranging from industrial and commercial environments to residential lighting systems. Featuring a multi-LED array, the unit ensures efficient and uniform light distribution. It is constructed with durable materials to ensure long-lasting performance while delivering high lumen output with low energy consumption.

Performance Metrics

Lumen Output

12800 lm

Lumen Output

Technical Specifications

Model Number	EL-180AA-00A
Power Rating	180 W
Expected Lifespan	40000 hours

Features

Suitable Applications	Industrial, Commercial, Residential
-----------------------	-------------------------------------
