

High-Leverage Pliers with Hardened Steel Jaws

These pliers are designed with high leverage for efficient cutting and gripping. Hardened steel jaws provide durability and precision, while ergonomic handles ensure comfortable use.

Product Overview

High-Leverage Design

These high-leverage pliers are engineered for demanding cutting and gripping tasks. Featuring hardened steel jaws, they offer exceptional durability and precision for professional applications. The ergonomic handle design ensures user comfort during extended use, while the rust-resistant finish promotes long-term tool longevity.
