

High-Performance Car Brake Pads with Wear Sensors

These high-performance car brake pads ensure optimal stopping power and durability. The robust friction material provides consistent braking across various temperatures and driving conditions, and they include wear sensors for easy monitoring.

Product Overview

High-Performance Braking Solution

These high-performance car brake pads are engineered to deliver consistent stopping power and durability across various driving conditions and temperature ranges. Designed with a robust friction material, they ensure reliability and safety for professional automotive applications. The inclusion of integrated wear sensors allows for proactive monitoring of brake pad life, simplifying maintenance and ensuring timely replacements.

Technical Details

Friction Code	FF
Part Number	PB169
Production Date Code	20130410

Features

Key Features	Wear Sensors Included, High-Performance Friction Material, Temperature Resistant, Easy Installation
