Product Overview

High-Performance Intercooler

This high-performance intercooler is engineered to significantly enhance engine efficiency and power output by effectively reducing intake air temperatures. Designed for turbocharged engines, it features a high-density core for optimal heat dissipation and minimal pressure drop. This unit is built to withstand high-pressure conditions, ensuring reliable performance and improved combustion efficiency for your vehicle.

Technical Specifications

Core Dimensions	665 x 284.4 mm
Tank Dimensions	47.5/47.5 x 292 mm

Compatibility

Compatible Models

- Buick Regal Sportback

Year	2020
------	------
