

# High-Performance Outdoor Flood Light

This flood light is designed for a variety of illumination applications. Its robust housing includes an integrated heat sink for thermal management, providing bright and uniform light distribution.

## Product Overview

### High-Performance Outdoor Flood Light

The HNF11507 is a robust outdoor flood light engineered for reliable illumination in commercial and industrial environments. Featuring a durable housing with an integrated heat sink, this unit ensures efficient thermal management for long-term operational stability. It delivers a bright, uniform light distribution, making it an ideal solution for areas requiring high-visibility lighting.

## Technical Specifications

### Power Performance

**35 W**

Power Consumption

**2000 lm**

Luminous Flux

**5400 K**

Color Temperature

Input Voltage 90~240V, 50/60Hz

CRI 70 CRI

## Physical Attributes

### Housing Color

White

Dimensions 366 x 245 x 129 mm

Net Weight 4 kg

## Operating Conditions

Operating Temperature Range -20 to 45°C
