

High-Performance Professional Audio Speaker

This professional audio speaker is designed for sound reinforcement applications. It features a multi-driver configuration and durable enclosure suitable for live performances, public address systems, and studio monitoring.

Product Overview

Professional Audio Excellence

This high-performance professional audio speaker is expertly engineered for robust sound reinforcement applications. It features a sophisticated multi-driver configuration that delivers an extended frequency response and superior sound pressure levels. Built with highly durable materials, the enclosure ensures long-lasting reliability in demanding environments. This versatile unit is perfectly suited for live performances, public address systems, and professional studio monitoring.

Technical Details

Core Features

- Multi-driver configuration
- Extended frequency response
- High sound pressure output
- Durable construction

Model Number	MP122
Recommended Applications	Live Performances, Public Address, Studio Monitoring
