

High-Power Aluminum Alloy Flashlight

This high-power flashlight features a durable aluminum alloy construction. It is water-resistant and designed to withstand drops and pressure.

Overview

High-Performance Illumination

This high-power aluminum alloy flashlight is designed for reliability and efficiency in professional environments. Equipped with a high-quality 3W LED emitter, it delivers a consistent 135-lumen output suitable for various inspection and illumination tasks. Its durable construction and compact design ensure it remains a dependable tool for daily operations.

Performance Metrics

Brightness

135 LM
Brightness

LED Lifespan	50000 hours
Battery Run Time	3.5 hours

Technical Specifications

Emitter Type	CREE XP-E (R2) white LED
Battery Requirements	3 x AAA
Switch Position	Tail
