

High-Power LED Emergency Lightbar

This LED lightbar features a new reflector and high-power LEDs. It is compatible with take-down or alley lights.

Overview

High-Performance Emergency Lighting

The High-Power LED Emergency Lightbar is a robust and high-intensity lighting solution designed for critical emergency and security applications. Featuring alternating red and blue LED modules, this unit is engineered to deliver exceptional visibility in demanding environments. Its durable construction ensures reliable, long-lasting performance for emergency vehicles and security fleets requiring effective, attention-grabbing illumination.
