

High-Precision Water Jet Grinding Machine

This machine is used for polishing molds and artificial limbs, carving crafts, and drilling circuit boards. It is also suitable for high-precision parts carving and wood engraving.

Product Overview

High-Precision Water Jet Grinding Machine

This high-precision water jet grinding machine is engineered for versatility and accuracy in fine material removal tasks. Designed with a portable form factor, it includes an integrated handle and a dedicated water reservoir for optimal cooling and lubrication during operation. The system features a variable speed control and a precision handpiece, making it an ideal tool for intricate applications ranging from electronics manufacturing to craft carving and dental work.

Applications

Suitable Applications

Nail Art, Wood Engraving, Craft Carving, Denture Polishing, Artificial Limb Polishing, Mould Polishing, Precision Parts Carving, Circuit Board Drilling

Technical Features

Key Design Features

- Portable design with integrated handle
- Integrated water reservoir for cooling and lubrication
- Digital display and control panel
- Variable speed control
- Flexible cable connection to handpiece

Model Identifier

JD4G
