Product Overview

High-Performance Cleaning Solution

This high-grade ceramic water spray gun is engineered for demanding cleaning tasks, offering exceptional water-saving capabilities and robust pressurization. Constructed with durable engineering plastics and copper components, it is built to withstand high-pressure environments while resisting wear, deformation, and discoloration. Ideal for professional car washing, irrigation, and heavy-duty surface cleaning, this tool provides reliable performance and ease of use.

Performance Metrics

Maximum Pressure

5000 PSI

Max Pressure

Maximum Flow Rate

20 L/min

Maximum Temperature

150 °C

Technical Specifications

Available Interface Connections

- 18*1.5
- 14*1.5
- 22*1.5
- 3/8 Quick Connector

Design Features

Rotating Swivel Joint • High-Pressure Resistant • Scratch Resistant • Direct Docking

Construction Materials

Engineering Plastic, Copper Interface, Ceramic Core

Applications

Typical Applications

- Vehicle Cleaning
- Garden Watering
- Agricultural Irrigation
- Ground Flushing
- Wall Washing
