

High-Pressure Grease Gun for Lubrication

High-pressure grease guns are designed for diverse lubrication tasks. They feature robust construction, ergonomic handles, and varied nozzle attachments suitable for automotive, industrial, and agricultural applications.

Overview

High-Pressure Lubrication Solutions

These high-pressure grease guns are engineered for precision and reliability across automotive, industrial, and agricultural maintenance tasks. Featuring robust construction and ergonomic handle designs, they ensure comfortable operation during extended use. The series includes multiple configurations to accommodate diverse pressure requirements and lubrication capacities, making them essential tools for professional maintenance environments.

Technical Specifications

Available Model Series

- LD-839
- LD-820
- LD-568
- LD-2138
- H
- LD-408
- LD-668
- LD-518
- LD-2211
- LD-812

Key Design Features

High Pressure • Ergonomic Handle • Robust Construction • Interchangeable Nozzles

Application Areas

Automotive, Industrial, Agricultural
