

High-Pressure Handheld Inflator Pump

This high-pressure hand pump is designed for efficient inflation of tires and other inflatables. It features a stable base and a precision pressure gauge for accurate inflation.

Product Overview

High-Pressure Handheld Inflator Pump

This high-pressure hand pump inflator is designed for efficient and reliable inflation of tires and various other inflatable items. It features a robust, durable construction with a stable base, ensuring ease of use during operation. Equipped with a precision pressure gauge, it allows for accurate inflation control, making it an ideal tool for home, workshop, or on-the-go maintenance.

Technical Specifications

Cylinder Diameter	38 mm
Cylinder Length	450 mm

Features

Key Features

- High-pressure design
- Integrated precision pressure gauge
- Stable base for stability
- Versatile valve head compatibility

Usage

Ideal Applications	Home Use, Workshop, On-the-go, Tire Inflation
