

High-Pressure Industrial Fluid Transfer Pump

This high-pressure pump is designed for demanding industrial applications. Its robust construction ensures durability and efficient fluid transfer.

Product Overview

Industrial Fluid Transfer Solution

This high-pressure industrial pump is engineered for demanding fluid transfer applications, providing reliable performance in hydraulic and lubrication systems. Constructed for durability and long service life, its precision-machined components minimize leakage while ensuring optimal volumetric efficiency. It offers versatile compatibility with various fluids, including hydraulic oils and coolants, and is designed for easy maintenance to minimize operational downtime.

Technical Specifications

Compatible Fluids

- Hydraulic Oils
- Coolants
- Lubricants

Suitable Applications

Hydraulic Systems, Lubrication Systems, Fluid Power Applications

Performance & Build

Key Features

Robust Construction • Precision-Machined • High Efficiency • Easy Maintenance
