

High-Pressure Plunger Pump for Industrial Applications

This high-pressure plunger pump is designed for various industrial applications, including food and beverage processing. It features robust construction with a red painted motor housing and brass pump components.

Product Overview

High-Pressure Industrial Plunger Pump

This high-pressure plunger pump is engineered for demanding industrial environments, including food and beverage processing. Its robust construction features a durable red motor housing paired with corrosion-resistant brass pump components. Designed for versatility, it includes an integrated pressure gauge and an adjustable regulator, ensuring precise fluid control for applications such as industrial cleaning, high-pressure spraying, and efficient fluid transfer.

Technical Specifications

Control Features

- Integrated Pressure Gauge
- Adjustable Pressure Regulator

Pump Type	High-Pressure Plunger Pump
Construction Materials	Brass Components, Metal Base

Applications

Primary Applications

Food & Beverage Processing • Industrial Cleaning • High-Pressure Spraying • Fluid Transfer
