

High-Pressure Pump End with Brass Manifold

High-pressure pump end designed for industrial applications such as pressure washers and fluid transfer systems. It features a durable, black-coated body and a brass manifold, with inlet and outlet ports for easy plumbing connections.

Product Overview

Industrial High-Pressure Pump Component

This high-pressure pump end is engineered for demanding industrial fluid transfer applications, including pressure washers. It features a robust brass manifold for enhanced corrosion resistance and a durable black-coated body for long-lasting performance in harsh environments. Designed with standard inlet and outlet ports, this component ensures straightforward integration into existing plumbing systems.

Technical Specifications

Primary Applications

- Pressure washers
- High-pressure fluid transfer systems

Materials	Brass, Coated Steel
Manifold Material	Brass
Body Finish	Black-coated
