Product Overview

High-Pressure Sodium Lighting Solution

This high-pressure sodium lamp features a clear tubular outer bulb designed for high luminous efficacy and long service life. Its robust construction includes an internal arc tube filled with a specialized blend of sodium, mercury, and xenon gas to ensure reliable performance. Ideally suited for industrial, horticultural, and street lighting applications, this lamp provides a warm, efficient light output with excellent durability.

Technical Specifications

Bulb Design	Clear tubular outer bulb
Base Type	Edison screw base

Applications

Primary Applications	Street Lighting, Industrial Lighting, Horticulture
----------------------	--

Quality and Standards

Product Grade	Mid-to-High Grade
Export Experience	15 years
