

High-Pressure Stainless Steel Water Pump

This high-pressure water pump is designed for irrigation and water transfer applications. It features a stainless steel pump body for corrosion resistance and reliable performance.

Product Overview

High-Pressure Stainless Steel Water Pump

This high-pressure water pump is engineered for durability and reliability in both domestic and industrial environments. Featuring a robust stainless steel construction, it offers excellent corrosion resistance for long-term operational life. It is an ideal solution for demanding applications such as irrigation, water transfer, and boosting system pressure.

Key Features

Suitable Applications

- Irrigation
- Water Transfer
- Pressure Boosting

Construction Material	Stainless Steel
Usage Environment	Domestic, Industrial

Performance

Performance Benefits

Corrosion Resistant • High Efficiency • Long Service Life

Motor	Electric Motor
