

High Pressure Submersible Pump

This high-pressure submersible pump is engineered for demanding applications requiring robust performance and reliability. Featuring a durable construction with a stainless-steel base and a high-impact polymer body, this pump is designed to withstand harsh environments.

Overview

High-Performance Submersible Pumping Solution

This high-pressure submersible pump is engineered for demanding applications requiring robust performance and reliability. Featuring a durable construction with a stainless-steel base and a high-impact polymer body, this pump is designed to withstand harsh environments. Its high-pressure capabilities make it suitable for dewatering, irrigation, and industrial fluid transfer, ensuring efficient operation and consistent performance.

Technical Specifications

Available Power Ratings

- 1000
- 1200

Performance Highlights

1000 W

Base Model Power

1200 W

High-Output Power

Compliance & Certification

Certifications

CE • GS

Design & Construction

Safety Features

- Thermal overload protection
- Corrosion-resistant construction

Key Materials

Stainless Steel Base, High-Impact Polymer, Specialized Sealing
