Overview

Professional High-Pressure Solution

This high-pressure triplex pump is engineered for demanding commercial and industrial cleaning applications. Powered by a reliable 6.5HP OHV engine with low oil protection, it offers consistent power and durability. Featuring a heavy-duty brass manifold and a vertical powder-coated frame, this unit is built to withstand rigorous daily use in professional environments.

Engine and Power

Engine Horsepower	6.5 HP
Engine Protection	OHV Engine, Low Oil Protection

Pump Specifications

Max Pressure

2700 PSI
Operating Pressure

Pump Type	Heavy-duty grade direct drive brass manifold triplex pump
-----------	-----------------------------------------------------------

Accessories and Hardware

Spray Patterns

- 0 degree
- 15 degree
- 25 degree
- 40 degree
- Soap nozzle

High-Pressure Hose

7.14mm (9/32 in) x 10m (30ft) with 3/8in QD

Gun and Wand

Professional trigger gun with safety-lock and 20-inch stainless steel wand with 1/4 inch quick connect

Construction and Design

Frame Construction

Powder-coated heavy-duty vertical frame, 24 gauge tube

Wheels

10 inch pneumatic wheels

Detergent Injection

Yes
