

High-Security Bicycle Lock with Steel Cable

This bicycle lock features a flexible steel cable coated in durable red vinyl. It is designed to resist cutting and protect bicycles from theft.

Product Overview

Professional Security Solution

This high-security bicycle lock is engineered for reliability in demanding urban environments. Featuring a flexible, high-strength steel cable encased in a protective vinyl coating, it provides robust resistance against cutting attempts. The included durable locking mechanism ensures quick and secure operation, making it an essential tool for protecting assets.
