Overview

Application

Advanced EM Security Solution

This high-sensitivity Electromagnetic (EM) security gate is specifically engineered for bookstores and retail environments to prevent inventory shrinkage. Utilizing advanced resin-glass materials and sophisticated signal processing, it offers reliable detection of security labels with minimal false alarms. The system is highly versatile, supporting multiple aisle configurations and customizable aesthetics to fit any modern retail layout.

Customization & Features

Integrated Features

- People counter available
- High sensitivity detection
- Wide detection distance
- Advanced signal processing

Customization Options

Logo, Color, Shape, PCB Board, Alarm Light, Frame Material, Cable Length, Advertisement Panels

Logistics & Compliance

Compliance & Certifications

CE • ISO • ROHS • SGS • MSDS

Gate Packaging

1 set per carton (158x50x18cm)

Gate Shipping Weight

24 kg

Controller Weight

6.5 kg
