

# High Speed Air Die Grinder

This high-speed pneumatic grinding machine is designed for precision material removal, deburring, and finishing. It features a lightweight aluminum housing for operator comfort and durability.

## Product Overview

### High-Speed Pneumatic Grinding Machine

This high-speed pneumatic die grinder is engineered for precision material removal, deburring, and finishing tasks. Featuring a lightweight aluminum housing, it ensures operator comfort during extended use while maintaining rugged durability. With variable speed control and an integrated safety lever to prevent accidental start-up, it offers both versatility and enhanced workplace safety for professional applications.

## Technical Specifications

### Free Speed

**25000 RPM**

Free Speed

Operating Pressure	90 PSI
Air Inlet	1/4" NPT
Collet Size	1/4 inch

## Features

### Key Features

- Lightweight aluminum housing
- Variable speed control
- Integrated safety lever
- Precision material removal capability

## Compliance & Usage

Applications	Material Removal, Deburring, Finishing
