

High-Speed Coin Sorter and Counter

High-speed coin sorter and counter designed for efficient and accurate coin processing. Features include multiple coin denominations sorting, digital display for count and value, and batch counting capabilities.

Product Overview

Professional Coin Processing Solution

This high-speed coin sorter and counter is engineered for high-volume environments requiring rapid and accurate financial processing. Designed for banks, retail businesses, and vending operators, it streamlines cash handling through automated sorting of multiple denominations. The device features an intuitive digital interface that displays both coin counts and total values, supporting efficient batch counting operations.
