

High-Speed Direct Drive Buttonholing Machine

This high-speed direct drive buttonholing machine is engineered for efficient and precise buttonhole creation. It features a robust direct drive motor for enhanced power and reduced noise, ensuring smooth and consistent operation.

Overview

High-Speed Direct Drive Buttonholing Solution

This high-speed direct drive buttonholing machine is engineered for efficient and precise buttonhole creation across a wide variety of fabrics. Featuring a robust direct drive motor, it delivers enhanced power with reduced noise levels, ensuring smooth and consistent operation in demanding industrial environments. Equipped with an electronic control panel and automatic thread trimming, this machine streamlines the sewing process to maximize productivity for garment manufacturing and custom tailoring.

Technical Specifications

Drive System	Direct Drive Motor
Key Features	Automatic Thread Trimmer, Electronic Control Panel, Adjustable Stitch Length, Adjustable Stitch Width, Low Noise Operation

Applications

Suitable Industries

- Garment Manufacturing
- Textile Production
- Custom Tailoring

Performance Metrics

Performance Highlights

1 Automated

Operation Type

1 Direct

Drive Type
