

High-Speed Direct Drive Electronic Bartacking Sewing Machine

This high-speed, direct-drive electronic bartacking sewing machine is designed for apparel and textile manufacturing. The machine offers precise and efficient bartacking operations with a direct-drive motor for smooth and quiet performance.

Overview

High-Performance Bartacking Solution

The T1900 is a high-speed, direct-drive electronic bartacking sewing machine engineered for professional apparel and textile manufacturing environments. It features a direct-drive motor system that ensures smooth, quiet operation while delivering precise and efficient bartacking performance. With an integrated electronic control panel, operators can easily program and adjust complex stitch patterns to meet specific production requirements, providing consistent and durable results across a wide range of fabrics.

Technical Specifications

Machine Type	Electronic Bartacking Sewing Machine
Drive System	Direct-Drive

Key Features

Operational Benefits

- Smooth and quiet motor operation
- Easy adjustment of stitch patterns
- Consistent performance for textile manufacturing
- Suitable for diverse fabric types

Core Capabilities

High-Speed Operation, Programmable Stitch Patterns, Electronic Control Panel, Durable Stitching
