Product Overview

Industrial High-Speed Punching Solutions

This high-speed material punching machine is engineered for high-volume, precise processing in the packaging and converting sectors. Designed for continuous web operation, it supports various tasks including creasing, die-cutting, and embossing for paper cups, plates, and boxes. With durable steel construction and an advanced control interface, this equipment provides the reliability required for intensive industrial production.

Capabilities

Applications

Paper Cup Production, Paper Plate Manufacturing, Paper Box Die-cutting, Square Box Forming, Creasing, Embossing

Logistics & Support

Production Lead Time

20-40 days after layout confirmation

Packaging Method

Flexible packaging with iron underframe

Standard Warranty

1 year limited warranty with free spare parts replacement for machine-caused defects

Installation & Training

Yes

Payment Terms

Payment Options

- 100% T/T (30% deposit, 70% before shipment)
- L/C at sight
