

High-Speed Overlock Sewing Machine

This high-speed overlock sewing machine is designed for efficient and precise fabric joining. It features adjustable stitch length and width, differential feed for preventing puckering, and a built-in motor for smooth operation.

Overview

Professional Overlock Solution

This high-speed overlock sewing machine is engineered for high-efficiency fabric joining in professional garment manufacturing environments. It features adjustable stitch length and width to accommodate diverse textile requirements, ensuring precise seams every time. The integrated motor design promotes smooth, reliable operation, while the advanced differential feed system actively prevents fabric puckering during the sewing process.
