

High Speed Plastic Drying Mixer

This high-speed mixer is designed for efficient mixing and drying of plastic materials. It features temperature and timer control, a stainless steel construction, and double wall protection to maintain temperature.

Product Overview

High-Speed Plastic Drying Mixer

This high-speed drying plastic mixer is engineered for the efficient processing of plastic materials, combining rapid mixing with effective drying capabilities. Built with a durable stainless steel construction, it ensures longevity and easy maintenance in demanding industrial environments. The unit features integrated temperature and timer controls, allowing for precise parameter settings to achieve uniform material quality.

Technical Features

Construction Material

Stainless Steel

Key Functionalities

- Temperature and timer control in one unit
- Double wall protection for temperature maintenance
- Airtight cellular mixing
- Automatic overload protection alarm

Safety Features

Overload Protection, Alarm System, Airtight Design

Operational Details

Operational Highlights

- Easy parameters setting
- Well-designed structure for easy operation
- Easy to clean

Available Options

- Magnetic separation process
